

S&P/JPX JGB VIX[®] Update July 2018

JGB VIX Spikes Ahead of BoJ Meeting

The S&P/JPX JGB VIX began the month at an all-time historical low (1.11) and remained near that level for three weeks. Then late in the day on July 20, 2018, there were several news reports that the Bank of Japan (BoJ) would be debating policy changes at their upcoming Monetary Policy Meeting (July 30-31, 2018). As measured by the S&P/JPX JGB VIX, this sent shockwaves through the markets in the trading sessions to follow and, as a result, the BoJ performed defensive operations to keep yields from skyrocketing ahead of the meeting. The BoJ policy decision announcement turned into a closely watched event with potential implications for global bond markets.

Market Expected to Challenge the BoJ

Ultimately, the BoJ ended up only tweaking current policy at the conclusion of its July meeting, with the aim of giving itself more flexibility. However, given the strong reaction (as measured by the S&P/JPX JGB VIX), market participants were clearly experiencing a heightened sense of risk anxiety. In the month ahead, it may be critical to monitor the S&P/JPX JGB VIX as the market challenges the BoJ regarding how far and how fast it is willing to let 10-year yields increase.
