

## Modification to the Methodology of the S&P Global Oil Index

**NEW YORK, SEPTEMBER 5, 2019:** S&P Dow Jones Indices (“S&P DJI”) announces a change to the methodology of the S&P Global Oil Index.

In order to reduce turnover, S&P DJI will amend the index’s treatment of spin-offs. The table below summarizes the change.

Change	Methodology	
	Previous	Updated
Spin-off Treatment	The spun-off company is removed after at least one day of regular way trading (with a divisor adjustment).	If the spun-off company is to remain in the underlying universe index, it will also remain in the index until the next index rebalancing as long as the spun-off company is classified into one of the eligible GICS sub-industries.

This change will become effective prior to the market open on Wednesday, September 11, 2019.

### ABOUT S&P DOW JONES INDICES

S&P Dow Jones Indices is the largest global resource for essential index-based concepts, data and research, and home to iconic financial market indicators, such as the S&P 500® and the Dow Jones Industrial Average®. More assets are invested in products based on our indices than products based on indices from any other provider in the world. Since Charles Dow invented the first index in 1884, S&P DJI has been innovating and developing indices across the spectrum of asset classes helping to define the way investors measure and trade the markets.

S&P Dow Jones Indices is a division of S&P Global (NYSE: SPGI), which provides essential intelligence for individuals, companies and governments to make decisions with confidence. For more information, visit [www.spdji.com](http://www.spdji.com).
