Introduction

Index Objective

The S&P Equity Futures and Currency Futures Indices is a family of indices that measures the performance of the nearest maturing equity and currency futures contract.

Index Family

The S&P Equity Futures and Currency Futures Indices consist of the following:

<table>
<thead>
<tr>
<th>Equity Futures Indices</th>
<th>Currency Futures Indices</th>
</tr>
</thead>
<tbody>
<tr>
<td>S&amp;P 500 Futures Index</td>
<td>S&amp;P U.S. Dollar Futures Index</td>
</tr>
<tr>
<td>Dow Jones Industrial Average Futures Index</td>
<td>S&amp;P Japanese Yen Futures Index</td>
</tr>
<tr>
<td></td>
<td>S&amp;P Australian Dollar Futures Index</td>
</tr>
<tr>
<td></td>
<td>S&amp;P Euro Futures Index</td>
</tr>
</tbody>
</table>

For each of the indices, both excess return (ER) and total return (TR) versions are calculated.

The indices are calculated on a real-time basis.

Supporting Documents

This methodology is meant to be read in conjunction with supporting documents providing greater detail with respect to the policies, procedures and calculations described herein. References throughout the methodology direct the reader to the relevant supporting document for further information on a specific topic. The list of the main supplemental documents for this methodology and the hyperlinks to those documents is as follows:

<table>
<thead>
<tr>
<th>Supporting Document</th>
<th>URL</th>
</tr>
</thead>
<tbody>
<tr>
<td>S&amp;P Dow Jones Indices’ Index Mathematics Methodology</td>
<td><a href="#">Index Mathematics Methodology</a></td>
</tr>
</tbody>
</table>

This methodology was created by S&P Dow Jones Indices to achieve the aforementioned objective of measuring the underlying interest of each index governed by this methodology document. Any changes to or deviations from this methodology are made in the sole judgment and discretion of S&P Dow Jones Indices so that the index continues to achieve its objective.
Index Construction

The S&P Equity Futures and Currency Futures Indices are constructed from the front month futures contract traded on global futures exchanges. The table below lists the contracts, corresponding exchanges and index base dates.

<table>
<thead>
<tr>
<th>Index</th>
<th>Underlying Futures Contract</th>
<th>Symbol</th>
<th>Exchange</th>
<th>Base Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dow Jones Industrial Average Futures Index</td>
<td>E-mini Dow ($5) Futures</td>
<td>YM</td>
<td>CME</td>
<td>06/14/2002</td>
</tr>
<tr>
<td>S&amp;P U.S. Dollar Futures Index</td>
<td>U.S. Dollar Index Futures</td>
<td>DX</td>
<td>ICE</td>
<td>09/09/1997</td>
</tr>
<tr>
<td>S&amp;P Australian Dollar Futures Index</td>
<td>Australian Dollar Futures</td>
<td>AD</td>
<td>CME</td>
<td>09/09/1997</td>
</tr>
<tr>
<td>S&amp;P Euro Futures Index</td>
<td>Euro Futures</td>
<td>EC</td>
<td>CME</td>
<td>06/08/1999</td>
</tr>
</tbody>
</table>

Exchange abbreviations:
CME – Chicago Mercantile, Inc. or its successor.
ICE – Intercontinental Exchange, Inc. or its successor.

Futures Roll

Each index is constructed from futures contracts and includes a provision for the replacement of the index futures contracts as they approach maturity (also referred to as “rolling” or “the roll”).

The futures contracts reflect the changes of an underlying financial instrument and are therefore referred to herein as the “financial instrument index futures contracts”.

This replacement occurs over a one-day rolling period every quarter, which is five days prior to the last trade date of the futures contract.

Market Disruptions during the Roll Period

Market disruptions are situations where an exchange has failed to open so that no trading is possible due to unforeseen events, such as computer or electric power failures, weather conditions or other events. If any such event happens on the roll date, the roll will take place on the next business day on which no market disruptions exist.

Calculation of Excess Return Index

The excess return of each of the indices is calculated from the price change of the underlying futures contract. On any trading date, \( t \), the level of each of the sub-indices is calculated as follows:

\[
ER_{Index_t} = ER_{Index_{t-1}} \times (1 + CDR_{t,t-1})
\]

where:

\( ER_{Index_{t-1}} \) = The Excess Return Index level on the preceding business day, defined as any date on which the index is calculated.

\( CDR_{t,t-1} \) = The Contract Daily return, defined as

\[
CDR_{t,t-1} = \frac{DCRP_t}{DCRP_{t-1}} - 1
\]
where:

\[ DCRP = \text{The Daily Contract Reference Price of the futures contract.} \]

Calculation of Total Return Index

Total return index levels are calculated as follows:

\[ TRIndex_t = TRIndex_{t-1} \times \text{IndexTotalReturn}_t \]  \hspace{1cm} (2)

where:

\[ TRIndex_{t-1} = \text{The Total Return Index level on the preceding business day.} \]

Calculation of Index Total Return

For a funded investment, the total return between dates \( t-1 \) and \( t \) includes the risk free return for the initial cash outlay is calculated as follows:

\[ \text{IndexTotalReturn}_t = (1 + CDR_{t-1} + TBR_t) \]  \hspace{1cm} (3)

where:

\[ TBR_t = \text{The daily-compounding Treasury Bill rate, as determined by the following formula:} \]

\[ TBR_t = \left[ \frac{1}{1 - \frac{91}{360} \times TBAR_{t-1}} \right]^{\Delta t} - 1 \]  \hspace{1cm} (4)

where:

\[ \Delta t = \text{The number of calendar days between the current and previous business days.} \]

\[ TBAR_{t-1} = \text{The most recent weekly high discount rate for 91-day U.S. Treasury bills, effective on the preceding business day.} \]

Currency of Calculation and Additional Index Return Series

In addition to the indices detailed in this methodology, additional return series versions of the indices may be available, including, but not limited to: currency, currency hedged, decrement, fair value, inverse, leveraged, and risk control versions. For a list of available indices, please refer to [S&P DJI’s All Indices by Methodology Report](#).

For information on the calculation of different types of indices, please refer to S&P Dow Jones Indices’ Index Mathematics Methodology.

---

1 The official close, as designated by the relevant exchange is used.

2 Generally, the rates are announced by the U.S. Treasury each Monday. On Mondays that are bank holidays, Friday’s rates will apply. The day count convention used is ACT/360.
Index Governance

Index Committee

S&P Dow Jones Indices’ Commodities Index Committee maintains the indices. The Index Committee may revise index policy covering rules for including currencies, the timing of rebalancing or other matters. S&P Dow Jones Indices’ considers information about changes to its indices and related matters to be potentially market moving and material. Therefore, all Index Committee discussions are confidential.

S&P Dow Jones Indices’ Index Committees reserve the right to make exceptions when applying the methodology if the need arises. In any scenario where the treatment differs from the general rules stated in this document or supplemental documents, clients will receive sufficient notice, whenever possible.

In addition to the daily governance of indices and maintenance of index methodologies, at least once within any 12-month period, the Index Committee reviews the methodology to ensure the indices continue to achieve the stated objectives, and that the data and methodology remain effective. In certain instances, S&P Dow Jones Indices may publish a consultation inviting comments from external parties.

For information on Quality Assurance and Internal Reviews of Methodology, please refer to S&P Dow Jones Indices’ Commodities Indices Policies & Practices Methodology.
Index Policy

Announcements

Rebalancing announcements, if needed, are made two days prior to the rebalancing date.

For more information, please refer to the Announcements section of S&P Dow Jones Indices’ Commodities Indices Policies & Practices Methodology.

Holiday Schedule

The indices are calculated daily, throughout the calendar year. The indices follow the NYSE holiday schedule.

A complete holiday schedule for the year is available at www.spdji.com.

For information on Calculations and Pricing Disruptions, Market Disruption Events and Holidays During Roll Period, Expert Judgment, Data Hierarchy, Unexpected Exchange Closures and Error Corrections, please refer to S&P Dow Jones Indices’ Commodities Indices Policies & Practices Methodology.

Contact Information

For questions regarding an index, please contact: index_services@spglobal.com.
Index Dissemination

Index levels are available through S&P Dow Jones Indices’ Web site at www.spdji.com, major quote vendors (see codes below), numerous investment-oriented Web sites, and various print and electronic media.

Tickers

The table below lists headline indices covered by this document. All versions of the below indices that may exist are also covered by this document. Please refer to S&P DJI’s All Indices by Methodology Report for a complete list of indices covered by this document.
