S&P Latin America Equity Indices Commentary:

The second quarter of 2017 was a volatile period for the region. In the midst of alleged political corruption potentially involving the sitting Brazilian president, May 18, 2017, saw the steepest single-day drop in the Brazilian equity market since the financial crisis in 2008. The drop affected not only Brazil, but the entire region.

So what happened this past quarter? While international markets soared these past three months, with the S&P 500® generating 3% and the S&P Europe 350 nearly 8%, the S&P Latin America BMI underperformed by just 1.3% (in USD), which in a way shows the resilience of the region. Brazil's decline was particularly focused in the energy and utility sectors with companies like Petrobras, Banco do Brazil, and Minas Gerais, which have strong representation in the country's equity market. The stock price drops in the 15%-30% range had the greatest impact on the regional indices. However, the S&P Latin America BMI still hung on to a strong return of 11% YTD and 16% for the one-year period.

When looking at Q2 performance in USD in Latin America ex-Brazil, the S&P Pacific Alliance Indices showed decent results—the S&P MILA Pacific Alliance Select returned nearly 5% and the S&P MILA Pacific Alliance Composite returned slightly over 5%. With the exception of information technology and materials, which were down 5% and 1%, respectively, almost every sector either outperformed or remained unchanged in Latin America ex-Brazil.

At the country level, in local currency terms, only Brazil showed significant underperformance for the quarter, as reflected by the S&P Brazil BMI. The best performers were Argentina, Colombia, and Mexico, with returns of 12.7%, 8.0%, and 7.4%, respectively. Chile was one of the markets directly affected by the Brazilian downturn, given that many Chilean companies have high exposure to the Brazilian market. Companies like LATAM Airlines and Cencosud generate a significant portion of their revenues from Brazil.

Within each country, the S&P/BOVESPA Quality Index and the S&P/BOVESPA Low Volatility Index had the best performance, with returns of 6% and 5%, respectively. These indices performed as expected during the volatile quarter, as quality stocks and low volatility measures prevailed and generated solid returns.

In Mexico, practically every index generated positive returns. The S&P/BMV IRT MidCap and the S&P/BMV FIBRAS were the best performers, with returns of 7.6% and 7.4%, respectively. The S&P/BMV IPC MidCap and the country's consumer discretionary sector were greatly aided by the strong price performance of companies like Grupo Elektra and Coca-Cola Femsa.

The Peruvian market benefited from the performance of companies in the financials and consumer sectors, including Credicorp and Intercorp for financials and Alicorp in the consumer sector. Mining had a challenging quarter; however, it was still the best-performing industry for the one-year period, returning over 25%.

Despite the difficult conditions of the region, local markets appear to be stable through the first half of 2017. It will be interesting to see if Brazil recovers or lags for the remainder of the year.

Performance Disclosure

The S&P/BOVESPA Non-State Owned Enterprises was launched June 1, 2017. The S&P/BOVESPA Inverse-Risk Weighted, S&P/BOVESPA Enhanced Value, S&P/BOVESPA Low Volatility, S&P/BOVESPA Momentum, and S&P/BOVESPA Quality indices were launched on April 30, 2015. The S&P Brazil Sector GDP Weighted was launched November 4, 2014, S&P Dividend Aristocrats Brasi launched on August 1, 2012, S&P Brazil Dividend Opportunities and S&P S&P Brazil Dividend Opportunities SmallMidCap indices were launched on February 8, 2013. The S&P/BVL Peru General was launched April 30, 2015, S&P/BVL Peru Select was launched December 1, 2014. All S&P/BVL Sectors and subsectors were launched on December 1, 2014. The S&P/BVL Peru Dividend Index was launched May 25, 2017. The Dow Jones Sustainability Chile was launched September 28, 2015. The S&P Colombia Select Index was launched October 31, 2013. The S&P MILA Andean 40 was launched on August 29, 2011. S&P MILA Pacific Alliance Completion, S&P MILA Pacific Alliance Select and S&P MILA Pacific Alliance Sectors were launched July 17, 2014. S&P MILA Pacific Alliance Select Ex-REITs index was launched May 18, 2015. The S&P/BMV Mexico Target Risk Index Series was launched November 1, 2016. The S&P MILA Pacific Alliance Midcap, Smallcap and Midsmallcap Indices were launched October 3, 2016.

All information presented prior to the index launch date is back-tested. All information presented prior to an index's Launch Date is hypothetical (back-tested), not actual performance. The back-test calculations are based on the same methodology that was in effect on the index Launch Date. Complete index methodology details are available at www.spdji.com.

S&P Dow Jones Indices defines various dates to assist our clients in providing transparency. The First Value Date is the first day for which there is a calculated value (either live or back-tested) for a given index. The Base Date is the date at which the Index is set at a fixed value for calculation purposes. The Launch Date designates the date upon which the values of an index are first considered live: index values provided for any date or time period prior to the index's Launch Date are considered back-tested. S&P Dow Jones Indices defines the Launch Date as the date by which the values of an index are known to have been released to the public, for example via the company's public website or its datafeed to external parties. For Dow Jones-branded indices introduced prior to May 31, 2013, the Launch Date (which prior to May 31, 2013, was termed "Date of introduction") is set at a date upon which no further changes were permitted to be made to the index methodology, but that may have been prior to the Index's public release date.

Past performance of the Index is not an indication of future results. Prospective application of the methodology used to construct the Index may not result in performance commensurate with the back-test returns shown. The back-test period does not necessarily correspond to the entire available history of the Index. Please refer to the methodology paper for the Index, available at www.spdji.com for more details about the index, including the manner in which it is rebalanced, the timing of such rebalancing, criteria for additions and deletions, as well as all index calculations.

Another limitation of using back-tested information is that the back-tested calculation is generally prepared with the benefit of hindsight. Back-tested information reflects the application of the index methodology and selection of index constituents in hindsight. No hypothetical record can completely account for the impact of financial risk in actual trading. For example, there are numerous factors related to the equities, fixed income, or commodities markets in general which cannot be, and have not been accounted for in the preparation of the index information set forth, all of which can affect actual performance.

The Index returns shown do not represent the results of actual trading of investable assets/securities. S&P Dow Jones Indices LLC maintains the Index and calculates the Index levels and performance shown or discussed, but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the Index or investment funds that are intended to track the performance of the Index. The imposition of these fees and charges would cause actual and back-tested performance of the securities/fund to be lower than the Index performance shown. As a simple example, if an index returned 10% on a US \$100,000 investment for a 12-month period (or US \$10,000) and an actual asset-based fee of 1.5% was imposed at the end of the period on the investment plus accrued interest (or US \$1,650), the net return would be 8.35% (or US \$8,350) for the year. Over a three year period, an annual 1.5% fee taken at year end with an assumed 10% return per year would result in a cumulative gross return of 33.10%, a total fee of US \$5,375, and a cumulative net return of 27.2% (or US \$27,200).

It is not possible to invest directly in an index. Exposure to an asset class represented by an index is available through investable instruments based on that index. S&P Dow Jones Indices does not sponsor, endorse, sell, promote or manage any investment fund or other investment vehicle that is offered by third parties and that seeks to provide an investment return based on the performance of any index. S&P Dow Jones Indices makes no assurance that investment products based on the index will accurately track index performance or provide positive investment returns. S&P Dow Jones Indices LLC is not an investment advisor, and S&P Dow Jones Indices makes no representation regarding the advisability of investing in any such investment fund or other investment vehicle. A decision to invest in any such investment fund or other investment vehicle should not be made in reliance on any of the statements set forth in this document. Prospective investors are advised to make an investment in any such fund or other vehicle only after carefully considering the risks associated with investing in such funds, as detailed in an offering memorandum or similar document that is prepared by or on behalf of the issuer of the investment fund or other vehicle. Inclusion of a security within an index is not a recommendation by S&P Dow Jones Indices to buy, sell, or hold such security, nor is it considered to be investment advice.
