Introduction

Index Objective and Highlights

The S&P/TSX Canadian Dividend Aristocrats® Index is designed to measure the performance of constituents of the S&P Canada Broad Market Index (BMI) which have followed a managed-dividends policy of increasing dividends. The index is weighted by indicated annual dividend yield. The Dividend Aristocrats constituent universe is reviewed every January.

The index methodology incorporates concentration limits. Modifications are made to stock weights to ensure no stock represents more than 8% of the index weight and to enhance index basket liquidity at the annual rebalancing.

Partnership

The S&P/TSX indices are calculated and managed by S&P Dow Jones Indices. The TMX Group Inc. (TMX) is the owner and distributor of all S&P/TSX equity index data.

Supporting Documents

This methodology is meant to be read in conjunction with supporting documents providing greater detail with respect to the policies, procedures and calculations described herein. References throughout the methodology direct the reader to the relevant supporting document for further information on a specific topic. The list of the main supplemental documents for this methodology and the hyperlinks to those documents is as follows:

<table>
<thead>
<tr>
<th>Supporting Document</th>
<th>URL</th>

<tr>
<td>S&amp;P Dow Jones Indices’ Index Mathematics Methodology</td>
<td>Index Mathematics Methodology</td>
</tr>
<tr>
<td>S&amp;P Dow Jones Indices’ Float Adjustment Methodology</td>
<td>Float Adjustment Methodology</td>
</tr>
</tbody>
</table>

This methodology was created by S&P Dow Jones Indices to achieve the aforementioned objective of measuring the underlying interest of each index governed by this methodology document. Any changes to or deviations from this methodology are made in the sole judgment and discretion of S&P Dow Jones Indices so that the index continues to achieve its objective.
Eligibility Criteria

Index Eligibility

To qualify for membership in the S&P/TSX Canadian Dividend Aristocrats Index, S&P Dow Jones Indices must first consider the company a “Dividend Aristocrat” by satisfying the following criteria:

1. The company’s security is a common stock or income trust listed on the Toronto Stock Exchange and a constituent of the S&P Canada BMI.

2. The security has increased ordinary cash dividends every year for five years, but can maintain the same dividend for a maximum of two consecutive years within that five year period.

3. The float-adjusted market capitalization of the security, at the time of the review, must be at least C$ 300 million. The float-adjusted market capitalization is calculated based on the volume weighted average price (VWAP) of the security on the Toronto Stock Exchange over the last 10 trading days of the month-end prior to the Annual Review.

4. For index additions, the company must have increased dividend in the first year of the prior five years of review for dividend growth. This rule does not apply for current index constituents.

The 12-month period ending December 31 and all dividend ex-dates are used for the dividend analysis, with the data being reviewed every January. In situations where a dividend payment, or payments, deviates from the company’s standard dividend payment cycle, S&P Dow Jones Indices will, at its discretion, allocate payments to the appropriate year in order to take a full cycle into account. New members are added to the S&P/TSX Canadian Dividend Aristocrats Index on the close of the last business day of January based on a review of the dividend payments of all constituents of the S&P Canada BMI.

The index has a minimum constituent count of 40 companies at the annual rebalancing. If there are not 40 eligible constituents in the review, the highest yielding companies with four years of eligible annual dividend growth patterns are used to supplement the index. If the index still does not have 40 constituents, the S&P/TSX Index Committee has the discretion of determining the remaining constituents.

Only ordinary dividend payments are considered. Evaluations are made on a best-effort basis using the S&P Canada BMI stock level dividend history.

Multiple Classes of Stock

Each company is represented once by the Designated Listing. For more information regarding the treatment of multiple share classes, please refer to Approach B within the Multiple Share Classes section of the S&P Dow Jones Indices’ Equity Indices Policies & Practices Methodology.
Index Construction

Index Calculations

The index is calculated by means of the divisor method used for all S&P Dow Jones equity indices. The index value is simply the index market value divided by the index divisor.

*For more information on the index calculation methodology, please refer to S&P Dow Jones Indices’ Index Mathematics Methodology.*
Index Maintenance

Annual Rebalancing

The index undergoes a rebalancing once a year in January. The reference date for such additions and deletions is after the close on the last trading date of December. Index constituent changes occur after the close on the last business day of January, at which date the new constituents are weighted according to their indicated yield as of the last trading date of December.

The following steps are taken during the January rebalancing:

1. All companies in the qualifying universe are ranked in decreasing order of indicated annual dividend yield.
2. The float-adjusted turnover (total number of shares traded in Canada and U.S. in the previous 12 months divided by float-adjusted shares outstanding at the end of the period) must be at least 0.20. For dual-listed stocks, liquidity must also be at least 0.10 when using Canadian volume only.
3. The Canadian and U.S. average daily value traded (ADVT) over the trailing 12-month period must be at least C$ 2 million for new constituents and C$ 1 million for existing constituents. For dual-listed stocks, ADVT must also be at least C$ 1 million for new constituents and C$ 0.5 million for existing constituents when using Canadian volume only.
4. Index members are weighted according to their indicated yield.

Additions. At each annual rebalancing, a company is added to the index if it is a constituent of the S&P Canada BMI and it meets the other eligibility criteria for this index.

No additions are made to the index between rebalancings.

Deletions. Index constituents may be deleted from the index for the following reasons:

- During the annual rebalancing:
  - If the company’s calendar year dividends decreased from the previous calendar year.
  - If the company’s year-end dividend payment remains flat for more than two consecutive years within the five year period.
- During the monthly dividend review:
  - If the company has reduced its calendar year dividend amount and will no longer qualify for index inclusion at the subsequent annual rebalancing.
- Between rebalancings:
  - If the stock is removed from the S&P Canada BMI.

Monthly Dividend Review

S&P Dow Jones Indices reviews index constituents on a monthly basis. If S&P Dow Jones Indices determines an index constituent has eliminated or suspended its dividend, omitted a payment, or reduced its calendar year dividend amount and will no longer qualify for the index at the subsequent reconstitution, it will be removed from the index effective prior to the open of the first business day of the following month and not replaced until the following reconstitution. Any changes are announced five business days prior to month end. The determination of qualifying for the index at the subsequent annual reconstitution is done.
at the discretion of the Index Committee. The decision to remove an index constituent due to dividend elimination, suspension, omission, or reduction is based on information publicly announced by the company as of seven business days prior to month-end.

**Constituent Weightings**

At the annual rebalancing, stocks are weighted based on indicated annual dividend yield and modifications are made to stock weights, if required, to reduce single stock concentration and enhance index basket liquidity as follows:

- No stock can have a weight of more than 8% in the index.
- The minimum initial portfolio size that can be turned over in a single day (based on recent Canadian and U.S. trading volumes) cannot be lower than C$ 100 million.

Basket liquidity capping sets a minimum portfolio size of C$ 100 million that must be turned over in a single day, based on the historical average value-traded pattern. The maximum weight parameter is the maximum weight of each stock at the rebalancing. These parameters may be changed depending upon market circumstances.

1. With data as of the rebalancing reference date, each company is weighted by indicated annual dividend yield.
2. If any company has a weight greater than 8% (where 8% is the maximum weight allowed in the index), that company has its weight capped at 8%.
3. All excess weight is proportionally redistributed to all uncapped stocks within the index.
4. After this redistribution, if the weight of any other stock(s), then, breaches 8%, the process is iterated until there are no stocks breaching the 8% weight limit.
5. A basket liquidity maximum weight (BL) for each company is, then, determined by dividing the C$ three-month average daily value traded using Canadian and U.S. volume by the basket liquidity amount (C$ 100 million). This weight is the maximum weight allowed for each stock in the index.
6. If any company has a weight greater than its BL maximum weight, that company will have its weight reduced to its BL maximum weight.
7. All excess weight is proportionally redistributed to all uncapped stocks within the index.
8. If, after this redistribution, the weight of any other stock(s) in the index exceeds its BL maximum weight, the process is iterated until no stock breaches its BL maximum weight.

The basket liquidity and maximum weight constraints are subject to change based on market conditions. If the basket liquidity rule cannot be satisfied for all index constituents after all possible iterations are completed, one or more of these constraints may be changed to ensure that the constraint is satisfied for all constituents.

**Currency of Calculation and Additional Index Return Series**

The S&P/TSX Canadian indices are calculated in Canadian dollars.

In addition to the indices detailed in this methodology, additional return series versions of the indices may be available, including, but not limited to: currency, currency hedged, decrement, fair value, inverse, leveraged, and risk control versions. For a list of available indices, please refer to S&P DJI’s All Indices by Methodology Report.

*For information on the calculation of different types of indices, please refer to S&P Dow Jones Indices’ Index Mathematics Methodology.*
Index Adjustments

</thead>
<tbody>
<tr>
<td>Deletion from the S&amp;P Canada BMI</td>
<td>If the constituent being deleted from the S&amp;P Canada BMI is a member of the Aristocrats, then it is removed from the Aristocrats index as well.</td>
<td>A divisor adjustment is made to ensure the index level after the deletion is equal to the index level before the deletion.</td>
</tr>
<tr>
<td>Share changes between quarterly share adjustments</td>
<td>None.</td>
<td>None.</td>
</tr>
<tr>
<td>Quarterly share changes</td>
<td>There is no direct adjustment.</td>
<td>None.</td>
</tr>
</tbody>
</table>

Corporate Actions

**Spin-offs.** The spun-off company is added to all the indices of which the parent is a constituent, at a zero price at the market close of the day before the ex-date (with no divisor adjustment). If a spun-off company is determined to be ineligible for continued index inclusion, it is removed after at least one day of regular way trading (with a divisor adjustment).

*For further information, please refer to the Treatment of Spin-offs and Corporate Actions in S&P Dow Jones Indices’ Equity Indices Policies & Practices Methodology.*

Base Date

Daily returns are available from December 21, 2001. The base value for both the price return and total return series starting on that date is 1000. The index is calculated on a real time basis.
Index Data

Calculation Return Types

S&P Dow Jones Indices calculates multiple return types which vary based on the treatment of regular cash dividends. The classification of regular cash dividends is determined by S&P Dow Jones Indices.

- Price Return (PR) versions are calculated without adjustments for regular cash dividends.
- Gross Total Return (TR) versions reinvest regular cash dividends at the close on the ex-date without consideration for withholding taxes.
- Net Total Return (NTR) versions, if available, reinvest regular cash dividends at the close on the ex-date after the deduction of applicable withholding taxes.

In the event there are no regular cash dividends on the ex-date, the daily performance of all three indices will be identical.

For a complete list of indices available, please refer to the daily index levels file (".SDL").

For more information on the classification of regular versus special cash dividends as well as the tax rates used in the calculation of net return, please refer to S&P Dow Jones Indices’ Equity Indices Policies & Practices Methodology.

For more information on the calculation of return types, please refer to S&P Dow Jones Indices’ Index Mathematics Methodology.
Index Governance

Index Committee

The S&P/TSX Canadian indices are maintained by the S&P/TSX Canadian Index Committee. The Index Committee is comprised of four members representing S&P Dow Jones Indices and three members representing the Toronto Stock Exchange (“TSX”). The Index Committee is chaired by a member designated by S&P Dow Jones Indices. Meetings are held regularly.

The Index Committee is responsible for setting rules and policies for the S&P/TSX Canadian Indices, determining the composition of the Indices and administering the methodology. In fulfilling its responsibilities, the Index Committee has full and complete discretion to amend, apply or exempt the application of the methodology and other index policies as circumstances may require, and add, remove or by-pass any security in determining the composition of any of the indices.

The Index Committee may rely on any information or documentation submitted to or gathered by it that the Index Committee believes to be accurate. Where a public document used by the Index Committee is available in both official languages, the Index Committee may assume that the contents of both versions are identical. The Index Committee reserves the right to reinterpret publicly available information and to make changes to the index based on a new interpretation of that information at its sole and absolute discretion.

Index corrections and changes to index composition are implemented at such time and in such manner, as the Index Committee deems appropriate. The timing of any index change made in response to a correction shall be at the sole and absolute discretion of the Index Committee.

Stock prices, VWAPs, and prices used to calculate QMV are prices determined by trading on the TSX. Canadian and U.S. trading volume is determined using the composite volume. Canadian trading volume includes trading on the TSX, Aequitas (Lit and Neo), Alpha, CSE (Pure Trading), Instinet Canada, Liquidnet Canada, Lynx, Nasdaq CXC, Nasdaq CXD, Nasdaq CX2, Omega and TriAct Match Now. U.S. volume will include trading volume on OTC markets only if the company is dual-listed on a U.S. exchange.

S&P Dow Jones Indices considers information about changes to its Canadian indices and related matters to be potentially market moving and material. Therefore, all Index Committee discussions are confidential.

S&P Dow Jones Indices’ Index Committees reserve the right to make exceptions when applying the methodology if the need arises. In any scenario where the treatment differs from the general rules stated in this document or supplemental documents, clients will receive sufficient notice, whenever possible.

In addition to the daily governance of indices and maintenance of index methodologies, at least once within any 12-month period, the Index Committee reviews the methodology to ensure the indices continue to achieve the stated objectives, and that the data and methodology remain effective. In certain instances, S&P Dow Jones Indices may publish a consultation inviting comments from external parties.

For information on Quality Assurance and Internal Reviews of Methodology, please refer to S&P Dow Jones Indices’ Equity Indices Policies & Practices Methodology.
Index Policy

Announcements
Whenever possible, announcements of additions or deletions of stocks or other index adjustments are made five trading days before the adjustments are implemented. In those cases when it is not possible to trade a stock five days after an announcement, the announcement period may be shortened. However, the implementation of an index adjustment is never earlier than the market close of the day following the announcement.

Announcements of additions and deletions for the S&P/TSX Canadian indices are generally made after market close. Press releases are released to major news services.

In addition, TMX Datalinx offers a fee-based subscription to Index Notices. The Index Notices provide the most detailed and comprehensive coverage of index changes. Complete data for index replication (including share counts, tickers and data on index levels and returns) are also available through TMX Datalinx. In order to subscribe, contact TMX Datalinx by phone at +1.416.947.4778 or by email at marketdata@tmx.com.

Holiday Schedule
The S&P/TSX Canadian indices are calculated when the Canadian equity market is open.

A complete holiday schedule for the year is available on the TMX Web site at www.tmx.com.

Rebalancing
The Index Committee may change the date of a given rebalancing for reasons including market holidays occurring on or around the scheduled rebalancing date. Any such change will be announced with proper advance notice where possible.

Unexpected Exchange Closures
For information on Unexpected Exchange Closures, please refer to S&P Dow Jones Indices’ Equity Indices Policies & Practices Methodology.

Recalculation Policy
For information on the recalculation policy, please refer to S&P Dow Jones Indices’ Equity Indices Policies & Practices Methodology.

Real-Time Calculation
Real-time, intra-day, index calculations are executed for certain indices whenever any of their primary exchanges are open. Real-time indices are not restated.

For information on Calculations and Pricing Disruptions, Expert Judgment and Data Hierarchy, please refer to S&P Dow Jones Indices’ Equity Indices Policies & Practices Methodology.

Contact Information
For any questions regarding an index, please contact: index_services@spglobal.com.
Index Dissemination

The TMX Group Inc. (TMX) serves as the distributor of both real-time and historical index data. In addition, index levels are available on S&P Dow Jones Indices Web site at www.spdji.com, through major quote vendors (see codes below), through numerous investment oriented Web sites and various print and electronic media.

Tickers

The table below lists headline indices covered by this document. All versions of the below indices that may exist are also covered by this document. Please refer to S&P DJI’s All Indices by Methodology Report for a complete list of indices covered by this document.
