Description
The S&P Pan Asia Financials Bond Index is designed to track the performance of local-currency denominated financial bonds from 10 countries in Pan Asia.

Index Attributes
The S&P Pan Asia Financials Bond Index is a subindex of the S&P Pan Asia Corporate Bond Index. Designed to be the broadest corporate bond benchmark in the Pan Asia region, the S&P Pan Asia Corporate Bond Index offers the most extensive picture of Asian corporate bond market structure, risk characteristics and performance. Using a transparent, rules-based and independent methodology, the S&P Pan Asia Corporate Bond Index covers corporate local-currency bonds issued by China, Hong Kong, India, Indonesia, Korea, Malaysia, Philippines, Singapore, Taiwan and Thailand. Sector- and country-based subindices are also available.

Methodology Construction
This index is a subindex of the S&P Pan Asia Corporate Bond Index. The methodology snapshot that follows applies to the S&P Pan Asia Corporate Bond Index.

- **Universe.** Securities must be corporate debt issued from one of the following 10 countries: China, Hong Kong, India, Indonesia, Korea, Malaysia, Philippines, Singapore, Taiwan and Thailand.
- **Currency.** Securities must be issued in local currency in their respective country.
- **Maturity.** Each bond must have a maturity greater than or equal to one month from the rebalancing date. No bond will reach maturity while in the index.
- **Coupon type.** The following coupon types may be included: fixed, zero, step-up (with a predetermined schedule) and fixed-to-float (provided they are fixed and one-month prior to their float date).
- **Exclusions.** The following bond types are specifically excluded from the index: STRIPS, inflation-linked bonds, floating-rate bonds, puttable bonds and sukuk bonds.
- **Optionality.** Bullets, callable and callable-perpetual (provided they are at least one month from the first call) are included. Fixed-to-floating rate securities also qualify provided they are callable within the fixed-rate period and are at least one month from the last call prior to the date the bond transitions to a floating-rate security.
- **Settlement.** Bonds that are issued but not settled prior to the month-end rebalancing are included in the index.

All information for an index prior to its Launch Date is back-tested, based on the methodology that was in effect on the Launch Date. Back-tested performance, which is hypothetical and not actual performance, is subject to inherent limitations because it reflects application of an Index methodology and selection of index constituents in hindsight. No theoretical approach can take into account all of the factors in the markets in general and the impact of decisions that might have been made during the actual operation of an index. Actual returns may differ from, and be lower than, back-tested returns.
